PORTRAIT OF ONE IMPORTANT 21.76 CT NATURAL EMERALD

Appendix to GRS2024-068934

Award No. 5088

GRS Laboratories examined a natural emerald of 21.76 ct, described in report number GRS2024-068934, demonstrating very good characteristics worthy of a dedicated mention.

This extraordinary emerald is distinguished by a very rare combination of large size, a saturated vivid green color variety, good clarity, very good brilliance and transparency, and well-balanced proportions.

Analytical and advanced testing traces the origin of this gemstone to the mines of the Ural Mountains in Russia. The fascinating internal world of Russian emerald inclusions is present in this particular emerald. At the time of testing, it was concluded that the gemstone had an insignificant degree of clarity enhancement.

The combination of very good attributes that this emerald displays was concluded to be important. The vivid green color radiates harmoniously in tone and color saturation. A high degree of lapidary craftsmanship adds value to the nature of this gemstone.

Emeralds of such large size and high quality are very rare.

Dr. A. Peretti
CEO GRS Laboratories

EXAMINATION RESULTS

GRS Report Number	GRS2024-068934 (Award No. 5088)
Date	21st June 2024
Object Description	One important gemstone
Identification	Natural Emerald
Weight	21.76 ct
Dimensions	18.52 x 21.33 x 11.69 (mm)
Cut	Brilliant/faceted
Shape	Heart
Color	Vivid green
Comment	CE(O): Insignificant
Origin	Ural (Russia)
